

EUREKA ADDONS

FIVE TIME WINNER OF THE SAGE CUSTOM SOLUTIONS PARTNER OF THE YEAR AWARD

As an award winning Sage Developer, we specialise in customising, enhancing and expanding **Sage 200**. Our range of Addons are proven to streamline business processes and our dedicated development team have the skillset to create bespoke solutions, tailored to your unique business requirements.

COURIER LINK

Connect Sage 200 to couriers including: **Royal Mail, Parcelforce, Asendia, NetDespatch Tuffnells** and **DPD**. Courier Link allows you to create shipping labels, generate and store tracking numbers and arrange courier collections all within Sage 200, removing the need to manually input and arrange collections on courier websites.

SALES ORDER PLUS

Sales Order Plus gives your staff quick and easy access to product and customer information from one screen, allowing orders to be entered up to ten times faster. This Addon can also increase sales by providing users with automated cross and up-selling screen prompts.

PURCHASE ORDER PLUS

Extends the standard Sage 200 order entry screen, providing you with a toolbar of utilities enabling access to supplier and stock information from one screen. Fully integrated with Sage 200 and accessible from Sage CRM, this Addon will enhance your purchase order processing capabilities.

PLUS PACK

Our Plus Pack for Sage 200 offers incredible value for money, consisting of over 80 Sage 200 enhancements. The Addons included have been honed over time and are designed to streamline Sage 200 processes and provide additional functionalities, making the entire system more intuitive and user-friendly.

WARRANTIES, SERVICE & REPAIRS

Simplify the process of managing the repair and servicing of goods under warranty. This module streamlines the management of warranty contracts, keeps track of assets with or without serial numbers and simplifies contract renewals, securing recurring revenue, whilst ensuring your client's goods are well looked after.

STOCK PLUS

Stock Plus transforms the stock management capabilities of standard Sage 200. Our multi-dimension stock matrix means your business can easily create and manage large quantities of variant stock items. Fully integrated with standard Sage 200 stock control, Stock Plus will give you full control over your merchandise.

WEB PO REQUISITIONS

Gain full control of purchasing within your business by implementing a levelled purchase approval process which can be accessed through any browser enabled device. Web Purchase Order Requisitions for Sage 200 allows users to manage purchase order requisitions in Sage 200 via a web interface.

DATA EXCHANGE

Integrate your e-commerce website or any third-party system with Sage 200 and cut data entry time in half. Automate laborious processes and ensure data accuracy with pre-configured integrations for platforms including: **Amazon, eBay, Shopify, ChannelAdvisor** and **Magento** with custom integrations available for industry specific solutions upon request.

FIXED ASSETS

Simplify the asset management process and banish complex spreadsheets. Fixed Assets fully integrates with the Sage 200 suite to maintain and control the complete lifecycle of your assets. Taking care of complicated depreciation calculations, this Addon provides a quick and simple way of managing your assets.

MOBILE APP

Access live Sage 200 data remotely anytime, anywhere. Compatible with iOS, Android and Windows devices our Mobile App gives you access to your Sage 200 data allowing you to create sales orders and capture customer consent on the move quickly and easily, from any smartphone or tablet.

WEB ORDERS

Remotely create sales and purchase orders in Sage 200 on the move via an easy to use web interface. Multiple users can input orders into Sage 200 without the need to purchase additional licences thanks to our user-friendly, customisable interface.

BESPOKE DEVELOPMENT

Our dedicated in-house development team have over 15 years' experience developing Sage 200 solutions. We pride ourselves on our ability to listen to our customers, working tirelessly to create solutions which exceed expectations, giving your business the tools it needs to grow and thrive.

"Eureka Solutions have understood our needs and requirements all the way through the specification process, to delivery and training. Their developers are both skilled and professional, backed up by an efficient support team. The overall experience was both smooth and rewarding for Numed and we would not hesitate to recommend Eureka Solutions to other businesses."

Nick Kenyon
Head of Operations at Numed Healthcare
